

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS 18TH CIVIL ENGINEERING GROUP (PACAF)
APO SAN FRANCISCO 96239

25 JUN 1990

REPLY TO
ATTN OF: CC

SUBJECT: Request for Study on Partial Release of Facilities and Areas on Okinawa

TO: Mr Takaki Kawai
Director, Facilities Division
Naha Defense Facilities Administration Bureau

1. References:

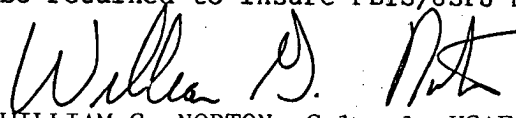

- a. Naha DFAB letter AFP No. 2271, 30 May 1990, subject as above.
- b. 18 CEG/CC letter, 7 May 1990, same subject.

2. We appreciate your concerns with the difficult problems in renewing lease agreements and to acquire continued use under the Special Measures Law. We have reviewed the land areas proposed for release and it was determined that subject to GOJ meeting relocation requirements, certain land areas may be favorably considered for release.

a. Land areas designated 3-1 and 3-3 may be considered for release subject to GOJ relocation of a support pole and an underground cable connected to the antenna on land areas designated 7-1 and 7-2.

b. Land areas designated 7-1 and 7-2 may be considered for release subject to GOJ relocation of 4 antennas (same dimensions and oriented in the same direction and height as they currently exist).

c. Land area designated 1-1, unfortunately, cannot be considered for release as previously stated in reference 1b. The area within the fence must be retained to insure FBIS/USFJ mission requirements are maintained.

WILLIAM G. NORTON, Colonel, USAF
Commander

NAHA DEFENSE FACILITIES ADMINISTRATION BUREAU
1-5-16, Kume, Naha-shi, Okinawa-ken

AFP No. 2271

30 May 1990

Subject: Request for Study on Partial Release of Facilities
and Areas on Okinawa

To: Brig Gen Ralph T. Browning
Commander
313th Air Division

Reference: (a) Naha DFAB letter dated 14 March 1990,
AFP No. 1154, same subject

(b) Your letter dated 7 May 1990, same subject

We appreciate your understanding and cooperation in making a prompt reply by reference (b) in response to our request for study on the partial release contained in reference (a).

As to the land lots within the Senaha Communication Station shown on the attached map as No.1-1,3-1 and 3-3, we understand the purport of your comments stated in reference (b). However, this office considers it is quite difficult to obtain the title of using the land by applying the "Law for Special Measures", and your reconsideration is solicited.

For the land lots shown on the attached map as No. 3-2 and 9-1, your reply was made that these lots could be considered for release.

On the other hand, there are some new land lots on which your study for partial release is needed since this office could not obtain the consent for pre-agreement from the landowners as originally expected and obtaining the title of using the land by applying the "Law for special Measures" is considered to be difficult.

It is, therefore, requested that study on the feasibility of releasing those new land lots be made and your comments together with the comments on the aforementioned request be submitted to this office as soon as possible.

The land lots to be newly requested for study on the partial release are listed on the enclosure 1 with the description of "New Request for Study" and shown in blue on the map.

Lastly, please be assured that this office will further endeavor to conclude the pre-agreements of the new lease contrancts.

Keijiyo Yanai

KEIJIRO YANAI

Director
